

# Waterless Stock Pot Cooker

This K+ waterless stock pot cooker is constructed on a solid mild steel frame complete with a thick mild steel plate, ensuring prolonged life.

This unit does not require any water deck cooling and is powered by either an 105Mj 24 jet chimney burner or 126Mj 18 jet duck burner which are fitted with flame failure as standard.

All external surfaces are made of AISI 304 stainless steel that is strong and durable. The deck is a 1.2mm pressed top which allows for ease of cleaning around the ring area. The cast-iron trivet has extended fingers and comes as a standard allowing for more efficient gas combustion while a lever handle gas controls allow for greater regulation of flame setting.

Front waste gutter allows for greater ease in cleaning while a heavily insulated long skirt unflued cast iron ring eliminates radiant heat.
